

# STEVE PERRY

Full Stack Web Developer  
*Lafayette, Colorado*

Web Development is a creative outlet for me. I enjoy finding my way to the solution almost as much as I do the solution itself. I'm a bit of a generalist, but I'm most comfortable implementing Front End UIs. My backend experience includes PHP (Laravel, Custom/Legacy) & Node (Sails.js, Serverless Functions)

## Skills

Javascript

React

Vue 2

jQuery

NPM

CSS

Bulma CSS

PHP

Node.js

Laravel

GitHub

HTML

## Web Developer - SeedBin, LLC

 SeedBin.com  October 2016 - Present

Work with Django developers or the QuickBase API to build UIs with either React or jQuery that encapsulate business processes that are not handled gracefully by enterprise ERP systems.

- Implement Auth0 as a means of authentication to a widely used (thousands of active users) React App
- Migrate legacy class based React App to functional components using hooks
- Create & maintain private NPM package for shared UI components
- Introduced Git & GitHub as a means of version control to the team (2016)
- Created boilerplate git repos for frontend solutions that employ Webpack, Gulp, AWS CLI, Angular CLI
- Created new UIs that more quickly and intuitively handle business processes like Inventory Maintenance and Order Fulfillment

# Owner - OptAllure

 [steveperrito.github.io](https://github.com/steveperrito)  September 2012 - Present

Develop custom solutions using RESTful APIs, PHP, HTML, CSS, and JavaScript.

- Created backend and frontend code bases that could be deployed from central location (using rsync) to 15 different servers/websites, while implementing site specific themes/variables and bringing order to what was previously disparate and ineffective forms of content management.
- Used previously unused data to target current clients for upgrades.
- Built out reporting tools that track sales, alert admin, and represent data visually.
- Countless front-end development tweaks to increase conversion across the board

## Full Stack Node.js Developer (Internship) - RackFX.com

 [RackFX.com](https://github.com/RackFX)  January 2016 - May 2016

Work within the Sails.js framework to bring RackFX's solution to users.

- Implement C.R.U.D. tasks using Sails' Waterline ORM.
- Use jQuery and Bootstrap3 for UI work.
- Use Git and GitHub along with Waffle.io in an agile environment.

## PHP Developer (Internship) - DigitalGlobe

 [maxar.com](https://github.com/maxar)  November 2014 - December 2014

Work within the Fat-Free PHP framework to resolve issues

- Use jQuery, Bootstrap3, Mustache.js to display data on frontend.
- Use Git and GitHub for version control.

# Bilingual Inside Sales Representative - Eldorado Trading Company

 Eldorado.net  August 2011 - September 2012

Instruct clients on how to leverage Eldorado's web resources (Open API, StoreExtender.com, and Drop-Ship services)

- Growth of gross monthly sales from an initial base of 10k to over 100k in 7 months

# Inside Sales Representative - ClickBank

 ClickBank.com  April 2010 - August 2011

Streamline client on-boarding with both technical and UI support.

- Managed Featured Marketplace product listings using Word Press.
- Completed training on ADTECH Helios IQ advertisement server.

## Education

**Boise State  
University**

International  
Business

*(Bachelor)*

May 2006 - April  
2009

Credit to Jeremy Thomas for maintaining Bulma and Bulmaswatch
